Jeff Mepham
Business Development Manager
Odorox- Hydroxyl Environmental Inc
Toronto, ON

Hi Jeff

Thank you for suggesting the BOSS Hydroxyl generating system to Nick and me.

Our home, which had an indoor pool that we filled in and converted to a Great Room, is currently for sale. The chlorine smell in the styrofoam ceiling from the 30+ years that the pool was enclosed has turned out to be an 'issue' for prospective buyers.

Nick and I were really at a loss on how to remove the smell, short of replacing 1500 sq. ft. of ceiling ourselves, at a cost of approximately \$10,000.

We used your BOSS system as instructed. You said it could take 4-5 days to remove the smell, but in no time at all (2 days) the chlorine smell was completely and permanently removed. We are amazed, and so grateful for this elegant solution.

We can show our house now *without* any worries. Our Great Room now truly smells 'great'.

We would recommend your company's systems *without reservation* to anyone in a similar situation.

I wish you and Odorox every success in the commercial and residential world.

Cheers-

Nicholas Maxheleau and Elizabeth Winter
