Brandon:

I would like to share the experience my family has had since bringing an Odorox Slim Line machine in to our apartment.

Please allow me to start by providing some background information. My daughter, who is 6, and I live in a 900 sq ft apartment in a 24 unit building in north Bismarck. We have lived there for over 5 years. My daughter has many health issues including chronic constipation, reflux, sinus issues and her IGG subclass II is low (basic immune deficiency).

Since bringing the Odorox unit in to our home in January, we have had our healthiest winter ever. In the past she has suffered from repeat sinus infections, often times each lasting more than one month. Prior to starting the Odorox Machine she had been fighting the same infection for over three months. We tried three separate rounds of oral antibiotics, an IVIG infusion and IV antibiotics and saw little if any results. Two weeks after starting the machine, her congestion was gone and has not returned. Her only infection since was an ear infection. This in itself is nothing short of amazing. She has never gone this long without being placed on some sort of medicine. We tried allergy medicines, antibiotics (oral and iv), ENT involvement, removed her tonsils and adenoids and nothing provided her with any relief. We also did both skin and blood testing for allergies, both of which came back negative. She herself has noticed the difference and comments on all of the different things she can now smell (flowers, lotions, soaps).

I almost need to mention that I am surprised how well this little machine controls odors. I can no longer smell what other people in the building are cooking or if they are smoking.

I am truly amazed at the difference this machine has made. I will admit I was highly skeptical that this "magic machine" would do anything for us. In fact, I have even tried shutting the machine off for three days, only to turn it back on as her congestion was returning. I am sold as to the effectiveness and validity of this machine.

Sincerely,

Heidi Stroh
