

Hello Jeff

I wanted to thank you personally for the opportunity to trial the Hydroxyl Unit for our Assisted Living Centers.

As you know we are a retirement residence that assists with physically and cognitive impairment of senior citizens.

We found your unit to be of tremendous use especially with the consistent smells associated with bladder problems.

Your machine was very useful for sanitizing our air in all (common) areas including lounges and dining room. Our home was able to keep flu outbreaks at a very non existent level. We put the machine into resident's room- who were showing signs of illness- and with in a couple of days all signs were diminished.

Thank you all for keeping our air healthy and wishing you much success
