

Our neighbor smokes constantly and since the ventilation in our building isn't adequate, the smoke fills our office as well. As a non-profit that serves pregnant women and young children, it was a constant frustration. We had even reached the point where we were going to look for new space. When John installed the two Odorox Air machines, we noticed the difference quickly. The air cleared up! Even the baby clothes we provide our clients stopped reeking of smoke! Our clients and volunteers commented on the difference. We are so grateful for these machines. They work so well and solved our problem!
