## Luxury Yachts Abu Dhabi

*HGI Industries has created cutting edge ultra violet hydroxyl generating technology which has been at the forefront of high volume odor processing, air-decontamination and air-purification. HGI's patented technology is the world's only scientifically proven non-contained Hydroxyl Generator. The ODOROX® products line of non-chemical devices provides an environmentally safe solution.*

### Problem

A leading marine company in the Middle East Region, with a portfolio of services that caters to all the needs of Ship Owners, Managers and Crews. The Yacht division operates a fleet of large yachts worldwide providing new builds and retrofits. A recent retrofit on a VIP yacht caused an odor problem due to the paint and adhesives (VOCS) used.

### Odor Solution

The Marine Company contacted the HGI industries Inc. distributor in Dubai - **Odorox Inair**. After an assessment **Odorox Inair** sold the yacht company the HGI industrial Boss Unit (pictured on right).

The BOSS unit worked superbly and destroyed all the VOC'S generated by the paints and adhesives.

## Luxury Yachts Abu Dhabi

### Results

After the renovation of the yacht was completed **Odorox Inair** was contacted to provide HGI's In Duct Unit models as a permanent solution for the luxury yacht. The IDU'S were strategically placed in the AC duct system that connected the Dining Room, Living Room, Guest Rooms, Captains and Crews Cabins along with the Kitchen area.

### Long Term

The yachting Industry as a whole represents an ideal market for HGI's green air purification products, whether after a major renovation, as is the case here, or in providing hydroxyl laden air to small berths and "live aboard's" where stale area air is a constant problem in the marine industry worldwide. The recessed wall or ceiling mount Architect and the portable My SPACE (pictured below) are two other ideal models for the smaller area (under 500 sq. ft.).
